

ProWrap™ by Fabrifoam® Products

Indication: Recommended as a superior strapping material, compression wrap and for custom bracing and support. Effective when protocol requires support with good strength and minimal elasticity. Especially useful for podiatric applications.

Features: A knitted nylon/spandex/foam composite. Delivers a medium degree of two-directional stretch with strong support, while allowing for adjustable compression. Dermatologically safe. Fabrifoam's patented ProWrap™ is available in numerous sizes for optimal fit. Wraps on and secures with hook & loop closure.

Benefits: Will not cause skin blistering or irritation. Lightweight, low profile, comfortable, simple and quick to apply. The foam side allows strapping to stay in place without the need to over-tighten or pinch the skin. Easily worn under most clothing. Reusable. Made in the USA.

Target Audience: Physiotherapist, OT, sports therapist, athletic trainer, podiatrist, chiropractic.
