

Thumb Spica

Product Overview:

- Recommended for instabilities and injury to the CMC and MCP joints.
- Permits healing, helps decrease pain and swelling, restricts motion while allowing full hand function with adjustable compression.
- Ideal for thumb arthritis and tendonitis, Gamekeeper's/Skier's Thumb, soft tissue injuries, hyperextension and post cast healing.
- Helps protect against strain/injury during high risk sports and repetitive movements at home or work.
- Delivers semi-rigid support in a thin, comfortable, slip-resistant device.
- Created with NuStimWrap™; available in sizes, can trim to customize.
- Latex-free, neoprene-free, easily applied, breathable, durable, washable.

Fabrifoam® Thumb Spica is available in both Blue and Black NuStimWrap. Add a suffix "A" for black or "B" for blue to the above item numbers to designate color. Also available in a camouflage print – add a suffix "D" for camo.

The Thumb Spica is available in pediatric size – left and right.

Sizes:

Product	Item #
