

# Thumb Spica X-treme™ by Fabrifoam® Products

**Brand New!**

***Indication:*** Recommended for instabilities and injury to the CMC and MCP joints. Ideal for thumb arthritis and tendonitis, Gamekeeper's/Skier's Thumb, soft tissue injuries, hyperextension and post cast care. Permits healing, helps decrease pain and swelling. Helps protect against strain/injury during high risk sports and repetitive movements at home or work. An excellent alternative to taping.

***Features:*** Delivers the *extreme in moderate to semi-rigid support* while allowing for adjustable compression and full hand function. Eliminates uncomfortable bulk, encourages range of motion. Strong yet flexible. Made from Fabrifoam's proprietary NuStim X-treme™; an advanced triple composite joining a hook-receptive fabric, a specially engineered stabilizing soft core and a unique open-cell outer foam. This next generation therapeutic material provides optimal support and cushioning. Two sizes fit most. Wraps on and secures with hook & loop closure.

*Latex-free*

*Breathable*

*Moisture-Wicking*

*Neoprene-free*

*Non-Slip*

*Washable*

*Adhesive-free*

*Hypoallergenic*

*Trim to Customize*

***Benefits:*** Dermatologically safe. Will not cause blistering or irritation. Lightweight, low profile, comfortable, easy and quick to apply. The foam side allows brace to stay in place without the need to over-tighten or pinch the skin. Easily hand wash and air dry. Reusable. Made in the USA.

***Target Audience:*** Physiotherapist, occupational therapist, sports therapist, athletic trainer, chiropractic.

*Bracing, compression and cushioning for a new level of comfort and excellence in musculoskeletal care.*
