*Advanced Compression/Support Therapy  
Wraps, Devices and Straps*

**fabrifoam<sup>®</sup>**

MADE IN THE USA

## SuperWrap™

- Provides a high degree of multi-directional elasticity with adjustable compression, support and conformability.
- Replaces traditional elastic wraps for treating a wide range of ailments and injuries.
- Perfect for hamstrings, hip spicas, chest wraps and shoulder abductions.
- Also useful for lymphedema, prune belly syndrome, DVT prevention & treatment and post-surgical care.

## MediWrap™

- Delivers a low to moderate degree of two-directional stretch with adjustable compression.
- Alternative to adhesive tape & traditional cloth bandages for wrists, thumbs, fingers, patellae and ankles.
- Short stretch, rigid support helps protect against strain and injury during work and athletics.
- Helpful for venous ulcer and CVI compression therapy.

## NuStimWrap™

- Provides a medium degree of two-directional stretch with adjustable compression and support.
- Superior replacement to neoprene wraps for wrist, elbow, ankle and knee support.
- Secures proper placement of electrodes, hot/cold packs and customized supports.
- Suggested for treatment & therapies of adult/pediatric biomechanical ailments.

## ProWrap™

- Delivers the most strength with a medium degree of two-directional stretch, while allowing for adjustable compression.
- Excellent as a superior strapping material, compression wrap and for custom bracing and support.
- Effective for podiatric therapies where high strength with minimal stretch is required.

## Enthera™

- Offers a two-way stretch with high modulus over an extended elongation, providing enhanced energy and recovery.
- Innovative option for controlled compression, support and bracing.
- Allows for customized repositioning and musculoskeletal correction.
- Useful in retraining through bias introduction to correct inappropriate muscle function.

# Fabrifoam® Products

*When you have the right material,  
imagine the possibilities...*

Created and patented by Fabrifoam Products, fabrifoam material is a fabric/foam composite marrying an open-cell, hydrophilic foam with high quality medical grade fabrics specifically engineered and designed for the treatment and prevention of musculoskeletal conditions.

This extraordinary material can be used safely and repeatedly to achieve optimal benefits. Its unique and innovative characteristics assure high patient compliance and successful outcomes. These products serve a wide variety of medical practitioners. A must for compression, support, bracing, repositioning and injury/aliment prevention protocols.

## Thumb Spica

- For instabilities and injury to the CMC/MCP joints, thumb arthritis, tendonitis, Gamekeeper's/Skier's Thumb, soft tissue injuries, hyperextension and post cast healing.
- Helps protect against strain/injury during high risk sports and repetitive movements. Permits healing, helps minimize pain and swelling.

## WristWrap™

- Customizable wrap to help prevent and protect against wrist strain and injury during work and athletics. Compression and support helps eliminate pain and discomfort.
- Five-feet long, perfect for hand support or as a thumb spica. Excellent alternative to adhesive wraps.

## BuddyUp™ Finger Splint

- For finger sprains, strains, minor fractures and post-operative alignment. Use preventively or when buddy taping is advised.
- Delivers semi-rigid support while encouraging range of motion. Trims apart to provide single, double or triple width for optimal use and fit.

## Ultra CarpalGard™

- Two-part wrist/thumb device with enhanced support to the CMC joint, effectively immobilizing the thumb without inhibiting daily activities. Provides custom fit and positioning.
- Useful for arthritis, tendonitis, carpal tunnel syndrome, wrist pain, wrist strain, UCL and other hand and wrist ailments.

## CarpalGard™

- Treats carpal tunnel syndrome (CTS), tendonitis, wrist pain and strain, arthritis and other hand ailments.
- Provides protection during activities. Semi-rigid support with adjustable compression.

### PSC™

- Dynamic orthosis to treat plantar fasciitis, excessive pronation, chronic heel pain, heel spur syndrome and shin splints.
- Reduces the heel strike force and biomechanically moves the foot into a more neutral alignment.
- Simulates low-dye taping, simple to use, with or without orthotics.

### AnkleGard™

- Easy support for ankle sprains and instability. Adjustable compression and double-strap design allow for customized application as a treatment or preventative of moderate ankle pain and injuries.

### Step-In Compression™

- Ideal for mild ankle pain and instability. Easy "step in" design provides light to moderate adjustable compression and support.
- Suitable for geriatric patients. Helpful for edema and discomfort.

### Ultra AnkleGard™

- Recommended for ankle sprains, pain, instability and extra ankle support.
- Helps prevent ankle injuries.
- Attached straps provide customizable semi-rigid support and compression.

### AnkleWrap™

- Customizable wrap to help prevent and protect against inversion and eversion injuries.
- Helps eliminate pain and discomfort. Aids in rehabilitation.
- 10-foot long for three heel locks and figure eights. Excellent alternative to adhesive wraps.

### VerSupport™ Ankle Wrap

- For ankle sprains, pain, arch collapse, tibialis, posterior and peroneal tendonitis.
- Provides support to plantar fascia, mid-foot, heel and Achilles tendon.
- Double-duty medial/lateral application.

### Tarsal Support Wrap

- Special orthosis to treat plantar fasciitis, chronic heel pain and excessive pronation.
- Includes added features for improved rear foot control and enhanced medial longitudinal arch support.

### Metatarsal Protection Jacket

- Helpful in reducing pain from metatarsalgia, bursitis, neuritis and capsulitis.
- Provides lightweight support, comfort and protection to the forefoot and submetatarsal area.

### VerSupport™ Heel Protection Wrap

- Useful for heel-related problems such as retrocalcaneal bursitis, insertional Achilles tendonitis, sub-calcaneal bursitis and fat pad atrophy pain.
- Provides comfort and support to the plantar and posterior heel aspects.

### Bunion Sling

- Recommended for bunion foot pain and deformity. Gently repositions the big toe (hallux) to minimize pain, pressure, discomfort and irritation. Ideal for pre-op and post-op care.
- Provides cushioned support and adjustable compression. Can be fastened medial or lateral for preferred toe positioning.

### ToeFx™

- Ideal for minor or small non-displaced fractures, cushioning and support, and as a surgery follow up.
- Secures two or three toes together to help stabilize/immobilize until healed.
- Excellent replacement for adhesive taping.

### KneeGard™

- Recommended for knee sprains, runner's knee, injury prevention and rehabilitation.
- Delivers custom patella support and positioning as it helps to reduce further stress and inflammation.

### PattStrap™

- Multi-use strapping. Relieves stress and pain of iliotibial band syndrome (ITBS) when applied above the knee.
- Apply below the knee to treat patella tendonitis, Osgood-Schlatter disease, chondromalacia and other knee ailments.
- Also available with reflective design for safety. Recommended by the U.S. Naval Academy.

### ElbowGard™

- Relieves pain and discomfort associated with tennis elbow, golfer's arm, tendonitis, and swimmer's arm.
- Use for cushioning, protection and as an excellent alternative to tape.

### Achilles Healer™

- Perfect for Achilles tendonitis to alleviate pain, tenderness, stiffness, swelling and discomfort. Helps to prevent and treat tendon injury, reduce inflammation and permit healing of tiny tendon tears.
- Provides cushioned support with adjustable compression.

**Feel  
the Difference ...  
See the Results™**

*Soft-to-the-touch, yet effective, all FabriFoam is skin safe and contains no latex, neoprene or adhesive. Its non-slip property assures stay-in-place application. Secures with Velcro®. Easy for practitioners, easy for patients.*

### ***Product Features:***

- Latex-Free
- Neoprene-Free
- Adhesive-Free
- Non-Slip/Stays in Place
- Breathable
- Moisture-Wicking
- Secures with Velcro®
- Washable & Reusable

### ***Product Benefits:***

- Extremely Comfortable
- Adjustable Compression
- Lightweight & Low Profile
- Hypoallergenic/No Skin Irritation
- Quick & Easy Application
- High Patient Compliance
- Fits Under Most Apparel
- Customizable
